Road Accident Laws and Traffic Safety

Date -06th April 2023

Program Report

K.K.Wagh College of Arts, Commerce and Computer Science, Chandori, Niphad was organized by lecture advocate Mrunal Burkule. In this regard the program was presided over by the principal of the college, Dr. R.K. Datir. Advocate Mrunal Burkule said that the biggest problem in India at present is the number of road accidents resulting in large number of deaths as well as injuries and disabilities. Therefore, there is a need to create public awareness about road accidents at the level of government, society and educational institutions, along with this, it is also necessary to create public awareness so that the accident victims get immediate help after a road accident. Because accident victims often die due to lack of timely help. He also said that it is necessary for everyone to know the laws related to road accidents and traffic safety. College Principal Dr. R. K. Datir in his presidential speech suggested several measures for safe travel, including initiatives to create awareness and educate the general public about road traffic safety. Along with this, students should regularly use helmets while riding two-wheelers and use seat belts while driving four-wheelers, should not use mobile phones while driving, and should regularly check vehicle brakes and tire air. Use care and safety for your vehicle's damaged tyres, get your vehicle insurance, PUC etc. certificates and documents from time to time and keep them with you.

Also, not only drivers are responsible for road accidents but pedestrians who cross the road in a dangerous manner are also responsible, so pedestrians as well as school children should cross the road carefully. Along with this, the huge number of vehicles increasing with the passage of time and the lack of roads in comparison is causing road accidents and traffic jams. Therefore, it is the need of the hour for all citizens to make maximum use of the public transport system, he said. He also appealed to everyone to cultivate social awareness that while driving, it is the duty of every driver to give way to an ambulance as soon as possible and thus indirectly help save someone's life.
