Empowering students from rural areas through quality education and imbibing human values in them.

To educate youth through quality education for holistic development by imparting value-based and skill-based education to transform students into a competent responsible citizen.

Principal's Desk

My dear Students,

Our college is a value-based education center located in a beautiful and convenient location. I assure you on behalf of all my colleagues that we will not be disappointed in the future with your decision to reunite with K. K. Wagh's Academic Family with hard work and Co-cooperation. The college will shine brightly and your future will be bright. Of course, this has been proved by the brilliant performance of our alumni in various fields.

Discipline, quality, and transparency are the triads of our work while implementing various academic and non-academic development schemes in the college. According to this, I think it is the need of the time in terms of nation building that the student should be secular than the need to inculcate a scientific approach in the context of the changing situation.

It is the college's priority to make every effort to ensure that every student in the college can cope with the life-threatening competition in the field of education. Presently, the prevalence of chauvinism and uniqueness among students has become a matter of concern for society. That is why discipline is the highest priority in college. Which is starting from me to the last working unit at the college.

In addition to daily teaching the college has always given priority to opportunities to the students to participate in National Service Schemes, Indoor games and outdoor sports, various competitions, Cultural programs, seminars, workshops, lectures by experts, as well as the Development of students is given more attention through counseling and competitive examination guidance center training and placement provide training and employment opportunities to the students.

Spacious building and well-equipped laboratories of science and computer science department, well-equipped library and student safety environment, natural surroundings, experienced and expert faculties, should give personal attention to students etc. are the strengths of the college, which will benefit you.

Dr. M. K. Deore
Principal
